The Grace Task Light is an excellent way to increase the light level in the specific area requiring high intensity light only some of the time. Task lighting levels are recommended to be no greater than 30 to 50 ft-cd, which is a measure of all light sources.

- Notes:
- 1 - Substitute Color Code for "XX"
 35 Tech White (3500K) - Stock
 WW Warm White (2800K) - Special Order

See Photometric Table for Light Output Levels of all Grace Products

- 2 - 1/2" Double Sided Tape is standard on center of bottom - used for temporary placement only.
- 3 - TLD-60WSO is outdoor rated - other supplies may be used outdoors with suitable enclosure
- 4 - Only PWM (Pulse Width Modulation) type dimmers can be used

Revision 11/1/07

Design Suggestion: Consider using a TLD-SW1 Switch when installing a Grace Task Light with other Grace Fixtures to allow easy on/off control at the fixture!
